EXTENDED WEAR FLOORING OPTION

LONG LIFE™ FLOORING  
EXTENDED WEAR FLOORING OPTION

## Longer Wear Life. Ecologically Sound.

Horner Flooring Company has long been an ecological leader within the sports flooring industry. It was one of the first manufacturing mills to advocate the benefits of 25/32" flooring over the previously-used industry standard of 33/32" flooring

Now it's the first to offer an extended wear life 25/32" product with the introduction of its Long Life™ (L<sup>2</sup>) Flooring product.

Horner's Long Life™ Flooring offers the ecological, cost savings and availability benefits of standard 25/32" product but with the extended wear life of 33/32" flooring. Long Life™ Flooring will be offered in maple with other products available upon request.

without the cost of 33/32"!*

## Long Life™ Benefits

- Extended Wear Life
- Ecologically Responsible
- Increased Availability
- Cost Savings
- Ease of Application

EXTENDED WEAR FLOORING OPTION

## LEED - GREEN BUILDING APPLICABILITY

Horner's Long Life™ product is an excellent candidate to be submitted for a LEED Innovation & Design Process Credit, as it embodies the credit's stated goal to recognize new technologies for their innovative building features and sustainable building techniques not currently addressed by existing LEED Credits.

Horner's Long Life™ Flooring is more ecologically sound as it minimizes wood waste when a floor has reached maximum wear depth. This is accomplished by shifting the tongue and groove assembly down, resulting in a higher proportion of flooring thickness being dedicated to wear depth. Less lumber is consumed for 25/32" product, regardless of wear depth, than is consumed for 33/32" product.

## AVAILABILITY

With ever-increasing sawmill focus being placed upon 4/4" rough-cut lumber, readily obtaining 5/4" lumber in a timely manner to produce 33/32" flooring has become tenuous at best.

## STRUCTURAL STABILITY

Horner's Long Life™ 25/32" product has the same structural strength and dimensional stability required of regular 25/32" flooring – only the tongue and groove profile has changed.

## APPLICATION

Long Life™ Flooring can be used over any Horner system utilizing at least one single layer of 15/32" plywood or 7/16" OSB or other manufacturer approved subfloor.

**HORNER FLOORING** is the leading manufacturer of athletic flooring systems used in high-school gyms, college and professional arenas, and public and private training facilities.

Please contact us regarding our extended maintenance warranty options.

Horner Flooring Company's policy is to continuously improve its line of products. Therefore, Horner Flooring Company reserves the right to change, modify or discontinue models, specifications and accessories of all products at any time without notice or obligation to any purchaser.

## DIMENSIONAL COMPARISONS

	As compared to Horner Long Life™ 25/32"		
	Standard 25/32"	Horner Standard 33/32"	Horner Long Life™ 25/32"
Wear Depth	<	<	
Thickness Under Groove	>	>	
Tongue Thickness	>	>	
Total Thickness	=	>	
Sandings <sup>1</sup>	5-6	9	9

Horner Long Life™ 25/32" allows 8-9 sandings

1. Number of sandings can vary significantly depending upon experience and equipment. Estimates are based upon 1/16" removal during sandings.
